

Detailing **flow** chart

Wash

For a pre-detail wash to remove old wax use an APC or strong wash.
For maintenance/regular washes use a pH neutral shampoo.

Clay

Cleanse your paint to remove any surface contamination.
Sometimes a rewash is necessary if heavily contaminated
Clay is needed every 6-12 months

**NO SWIRLS

MARKS**

**SWIRLS
OR
MARKS**

Polish

Poor Condition

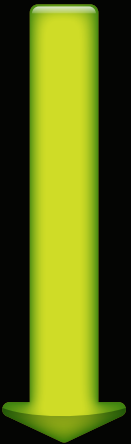

Restore dull, faded or heavily swirled paint with a compound or heavy polish, by machine

Moderate Swirls

Remove moderate swirls or oxidation with a medium polish, usually by machine

Very Light Swirls

Enhance gloss and depth with a finishing polish or paint cleanser with micro abrasives, can be by machine or hand.

Protect

Wax - Premium Carnauba offers the ultimate depth, intensity and gloss
Sealant - Polymer/Synthetic offer a high shine and long last durability
Wax + Sealant - certain combinations can offer you the best of both worlds

Maintain

A Protection Quick Detailer offers extra sparkle & protection for the paint

Always make sure your car is cool and preferably undercover/in shade before starting any washing or detailing.

Never let a product dry on the car unless it states that it must on the label.
